

**IN THE SPECIFICATION**

**Please amend the specification as follows:**

On page 10, lines 16-22, please amend the following paragraph:

In response, the selected composite image 162, 164, 166 may be displayed in the image area 84. Once an image has been selected, the user may select the image or text tab (FIG. 18 17) and edit the selected composite image. Editing may occur by selecting the text tool and typing in corrections, add new boxes, change box size (all as described above), or substitute new content. New content may be substituted by dragging new content into the space of existing content. When this is done, the new content completely replaces the old content.
